ABOUT ME

I'm Jenny, a passionate Georgia-bred Puerto Rican. I eat, breathe, and dream of art, design and experience while my pores ooze of inspiration... I am an expert of identifying, sharing, and making great things and environments both in real life and virtually.

I began my creative design journey with a BFA in Interior Design from SCAD. It is my fascination of the psychology of space, good design, and human experience that got me started. I then quickly learned how to fuse this knowledge with my love for art and my keen visionary mind. My superpowers are: re-envisioning, producing, and designing space to perfection from conception to completion.
